1 Introduction

2 Typology

2.1 Word Order

The default sentence structure in Sumsgiwa is VAP/VS (VSO). Negative clauses are AVP/SV (SVO), and nouns can be topicalized by moving them to the front of the clause.

2.2 Morphological Typology

2.2.1 Synthesis

Sumsgiwa is a somewhat polysynthetic language, with many morphemes occurring in each word.

2.2.2 Fusion

Sumsgiwa is highly agglutinative, with most morphemes having only one meaning.

2.2.3 Morphological Processes

Sumsgiwa inflects its words mostly through the use of prefixes. There are also a few suffixes and stem modifications.

3 Phonology

3.1 Consonants

	Bilabial		Alveolar		Postalveolar	Palatal	Labiovelar	Velar	
Plosive	[p ^h] /p/ ⟨p⟩	[b] /b/ ⟨b⟩	[t ^h] /t/ ⟨t⟩	[d] /d/ ⟨d⟩				[k ^h] /k/ ⟨k⟩	[g] /g/ ⟨g⟩
Nasal		[m] /m/ ⟨m⟩		[n] /n/ ⟨n⟩					[ŋ] /ŋ/ ⟨ñ⟩
Fricative			[s] /s/ ⟨s⟩	[z] /z/ ⟨z⟩	[ʃ] /ʃ/ ⟨š⟩	[ʒ] /ʒ/ ⟨ž⟩			
Approximant						[j] /j/ ⟨y⟩	[w] /w/ ⟨w⟩		
Affricate			[ts] /ts/ ⟨c⟩	[dz] /dz/ ⟨č⟩	[tʃ] /tʃ/ ⟨č⟩	[dʒ] /dʒ/ ⟨j⟩			

3.2 Vowels

	Front	Back

Mid	[e ~ ε] /e/ ⟨e⟩	[o] /o/ ⟨o⟩
Open	[a] /a/ ⟨a⟩	

3.3 Syllable Structure

Syllables in Sumsgiwa consist of an onset, a nucleus, and a rhyme. Most syllables are open. Syllable possibilities:

CV(N)

C = p, b, t, d, k, g, m, n, ñ, s, z, š, ž, y, w, c, ž, č, j

V = i, u, e, o, a

N = m, n, ñ

SPV(N)

S = s, š

P = b, d, g

V = i, u, e, o, a

N = m, n, ñ

3.4 Stress

Stress always falls on the penultimate syllable of the word stem and does not move when prefixes or suffixes are added.

Both adjectives and verbs must agree with nouns in gender.

4.1.5 Pronouns

There are different pronoun forms for each of the 5 cases. Pronouns in Sumsgiwa distinguish between 1st person exclusive and 1st person inclusive, and there are 3 politeness levels for 2nd person pronouns. In addition, there are 3 sets of pronouns for each of the 3 genders.

First person exclusive 1ex 1st person, excluding the hearer

First person inclusive 1in 1st person, including the hearer

Second person polite 2pol 2nd person, used in formal or neutral circumstances

Second person humiliative 2hum 2nd person, used when speaking to figures of authority, elders, etc.

Second person familiar 2fam 2nd person, used when speaking to friends and/or family members

Third person 3 3rd person

4.1.5.1 Human

	Nominative NOM	Ergative ERG	Accusative ACC	Dative DAT	Genitive GEN
Third person 3	⟨yo⟩	⟨zin⟩	⟨je⟩	⟨sayo⟩	⟨zeyo⟩

4.1.6 Adpositions

Sumsgiwa uses prepositions that take uninflected nouns. The prepositional phrases follow the verb. However, some functions usually covered by adpositions in other languages are covered by the dative case.

4.2 Noun and Noun-Phrase Operations

4.2.1 Noun-Noun Compounding

Nouns are compounded by juxtaposition, with the new combined form inflected as one word.

4.2.2 Denominalization

There are two ways nouns can be verbalized, with different meanings. In both cases, morphological changes are applied to the uninflected forms of the nouns.

The prefix ⟨do⟩- converts the noun into a verb meaning “to become [noun].”

The prefix ⟨ke⟩- changes the noun into a verb that means “to have [noun].”

4.2.3 Adjectivization

A noun can take adjectival case and gender markings to become an adjective meaning “similar to [noun].”

4.2.4 Determiners

4.2.4.1 Demonstratives

Demonstratives agree with the nouns they modify in gender, and are split into 3 categories. They go after the nouns they modify.

Proximal prox Close to the speaker

Medial med Close to the listener

Distal dist Far from both the speaker and the listener

	Proximal PROX	Medial MED	Distal DIST
Human H	⟨keši⟩	⟨zišgo⟩	⟨simsbe⟩
Animate AN	⟨gunzin⟩	⟨sgaku⟩	⟨densi⟩
Inanimate INAN	⟨dazo⟩	⟨yezi⟩	⟨šosu⟩

Sumsgiwa does not have demonstrative pronouns, so it uses a demonstrative adjective and a generic noun to specify the same meaning.

4.3 Verb and Verb-Phrase Operations

4.3.1 Negation

When verbs are negated, the first consonant of the verb stem changes from a voiced consonant to an unvoiced one, or vice versa, and the clause-level word order changes from VAP/VS (VSO) to AVP/SV (SVO). If the initial consonant is ⟨y⟩ or ⟨w⟩, it becomes ⟨n⟩, ⟨m⟩, or ⟨ñ⟩, and vice versa. Which one the consonant becomes is unpredictable and must be memorized on a per-word basis.

4.3.2 Interrogatives

4.3.2.1 Yes/No Questions

Yes/no questions are marked by placing the question particle ⟨šgezu⟩ at the beginning of the sentence.

4.3.2.2 Content Questions

Content questions use the same interrogative marker as yes/no questions, ⟨šgezu⟩, but also use the following question words in situ:

Nominative Noun	⟨sensu⟩	
Ergative Noun	⟨senyu⟩	
Accusative Noun	⟨senge⟩	
Dative Noun	⟨senbi⟩	
Genitive Noun	⟨senžo⟩	
Time Adverb	⟨šanbi⟩	
Location Adverb	⟨šanzim⟩	
Manner Adverb	⟨šanže⟩	
Purpose/Reason Adverb	⟨šansum⟩	

4.3.3 Imperatives

Imperatives are in the deontic mood and have either the imperative particle ⟨sesum⟩ or the negative imperative particle ⟨dosika⟩ in front of the sentence. When the speaker is telling the hearer to do something, the agent is dropped and the patient goes into the nominative case.

When both the agent and patient are present in the sentence, the speaker is telling the hearer to ask the agent to perform the action.

4.3.3.1 Polite Imperatives

Polite imperatives use the optative mood instead of the deontic mood. Additionally, the agent is explicitly expressed using either the second person polite 2POL or second person humiliative 2HUM pronouns.

4.3.4 Causatives

Causatives in Sumsgiwa are marked with the prefix ⟨kaga⟩- on the fully-inflected verb. The tense/aspect inflections are still for the action itself rather than for causing the action. The causer takes the ergative case while the causee will take either the accusative or dative cases. The dative case is when the causee has little agency in the situation, while the accusative case is when they have some amount of agency.

4.3.5 Possessor Raising

Intransitive verbs with possessed subjects can be expressed as transitive verbs with the possessee as the agent and the possessor as the patient.

4.3.6 Argument Omission

Any argument of a verb can be omitted as long as the omitted noun is clear from context.

4.3.7 Verb Compounding

4.3.7.1 Noun Incorporation

4.3.7.1.1 Subject/Agent Incorporation

Subjects and agents are incorporated by moving their uninflected forms before the verb stem. Any prefixes that go on the verb will move to before the incorporated noun.

4.3.7.1.2 Patient Incorporation

Patients are incorporated by moving their uninflected forms after the verb stem. Any suffixes the verb may take will go after the incorporated patient.

4.3.7.2 Verb-Verb Incorporation

Verbs are compounded by juxtaposition, with inflections applied to the new combined word.

4.3.8 Nominalization

4.3.8.1 Action Nominalization

Action nominalization is achieved by adding case markings onto the uninflected form of the verb.

4.3.8.2 Agent/Subject Nominalization

Sumsgiwa nominalizes the typical agent or subject of a verb by adding the prefix ⟨juzi⟩- to its uninflected form.

4.3.8.3 Patient Nominalization

The typical patients of verbs are nominalized by adding the suffix -⟨sokuñ⟩ to the verbs' uninflected forms.

4.3.8.4 Instrument Nominalization

Sumsgiwa nominalizes the typical instruments of a verb by adding the suffix -⟨sodise⟩ to its uninflected form.

4.3.8.5 Location Nominalization

Sumsgiwa nominalizes the typical locations where a verb happens by adding the suffix -⟨gomsa⟩ to its uninflected form.

4.3.8.6 Product Nominalization

Sumsgiwa nominalizes the typical products of the action represented by a verb by adding the suffix -⟨sigo⟩ to its uninflected form.

4.4 Adjective and Adverb Operations

4.4.1 Derivational Morphology

Any adjective can take adverbial grammar markings, and vice versa.

4.4.2 Comparatives and Superlatives

The comparative form of an adjective or adverb is formed by reduplicating the first syllable of the word stem.

- (1) $\check{c}\check{c}\text{le}$
žučušo
žu~ žušo
CMPR~pretty
“prettier”

The construction used for both adjectives and adverbs is splitting up the statement into two sentences. The adjective or adverb is in the comparative form, and the second, repeated, verb takes no grammatical markings.

- ñizu ni- ku~ kuše ja- šumzan*
walk HAB-CMPR~slowly NOM-dog

The second comparative construction only applies to adjectives. To compare two nouns, the comparative verb *⟨kogu⟩* is used. It is only inflected for the gender of the comparee noun using the ergative suffixes. The comparee noun takes the ergative case and the standard noun takes the dative case and the comparative adjective in question.

- ## 4.5 Clause Operations

Any argument of a verb can be left-dislocated by adding the suffix $-\langle \text{sugu} \rangle$.

Sumsgiwa has cleft constructions consisting of the noun phrase, the predicate nominal copula [See 4.6.2 Predicate Nominals], and a headless relative clause [See 4.7.3 Relative Clauses], in that order.

4.6.1 Simple Declarative Sentences

16

4.6.2 Predicate Nominals

Predicate nominals use a defective copula COP verb, ⟨se⟩, that inflects for mood but not aspect or gender. These constructions encompass proper inclusion, where something is asserted to be among the class specified by the nominal predicate, and equative clauses, where two things are asserted to be the same.

4.6.3 Predicate Adjectives

Predicate adjectives in Sumsgiwa consist of the noun and properly inflected adjective juxtaposed with each other, with no copular verbs or particles.

4.6.4 Predicate Locatives

Predicate locative constructions use the locative adposition, ⟨šim⟩, as a defective verb, inflecting it for mood but not for aspect or gender.

4.6.5 Existentials

Existentials use the same copular verb as predicate nominals, ⟨se⟩, and also only inflect it for mood.

4.6.6 Possessive Clauses

Possessive clauses use the same verb as predicate locatives, ⟨šim⟩, also only inflected for mood. The possessor is placed in the genitive case.

4.7 Clause Combinations

4.7.1 Complement Clauses

Sumsgiwa forms complement clauses by adding a case-marking prefix onto the verb.

4.7.2 Adverbial Clauses

Adverbial clauses use an adposition combined with a relative clause. The adposition, word expressing the function of the adverbial clause, and relativizer are shortened into one word.

4.7.3 Relative Clauses

Relative clauses come after the head noun. They are introduced with the relativizer ⟨šužon⟩ and use a pronoun retention strategy for case recoverability. All clause elements can be relativized.

4.7.4 Coordination

4.7.4.1 Conjunction

There is no special morphosyntax for conjunction, with clauses simply juxtaposed next to each other. So, any two clauses in Sumsgiwa can be said to be conjoined.

4.7.4.2 Disjunction

Disjunction is expressed with the particle ⟨ziše⟩ inserted between the two clauses.

5 Quantifiers

5.1 Numerals

There are 3 numeral systems in Sumsgiwa, each modifying a different gender of noun. The inanimate numerals are used for counting.

Numerals modifying human nouns are base 8.
